PROFESSIONAL PROFILE

Full Stack Developer with solid experience in .NET, React, and Node.js technologies. Passionate about building scalable and efficient solutions with a strong focus on code quality and user experience. I'm looking to join challenging projects where I can keep learning and contribute through my technical versatility and functional perspective. Skilled in both backend and frontend development, databases, APIs, microservices, and agile methodologies.

PROFESSIONAL EXPERIENCE

RD-ITS 🇲🇽

Full Stack .NET + Blazor Developer | Functional Analyst
Jan 2023 – Mar 2025

Key contributor in the development and evolution of **HOLO**, a low-code/no-code platform designed for creating customizable enterprise subsystems.

- Full stack development using **.NET** and **C#**, working on the architecture of reusable components with **Blazor**.
- Functional analysis and requirement gathering with clients to design and implement tailor-made modules (e.g. vendors, bonuses, time off, contracts, etc.).
- Collaboration with UX designers, QA engineers, Product Owners, and development teams.
- Key improvements implemented:
    - **AI integration** to scan and extract relevant data from contracts (e.g. expiration dates, vendor names).
    - **In-app chat system** using **SignalR**, enabling module-specific communication.
    - **Event-based bidding system** between providers, also powered by SignalR.

Together Devs 🇺🇸

Frontend React Developer
Dec 2021 – Dec 2022

Frontend development of **Simple Shops**, an e-commerce web app allowing users to easily create their own online stores.

- UI implementation with **React** and **Redux**, focusing on responsive design for both desktop and mobile.
- Backend integration with **Node.js**, working closely with fellow developers and a Product Owner.
- Developed core features including shopping cart, product management, and online checkout flows.
- Contributed until the platform was deployed to production, ensuring product stability and scalability.

N5 Now 🇦🇷

Full stack .NET + React Developer
Jun 2020 – Dec 2021

In charge of maintaining and migrating the medical payment system for **Hospital Británico**, modernizing the existing architecture.

- Migration from legacy **ASP.NET** system to a modern solution using **.NET Core**, **React**, and **SQL Server**.
- Performance tuning and optimization of critical **stored procedures** within the database.
- Functional analysis for process clarification and flow documentation during the migration.
- Introduced best practices in architecture to enhance maintainability and scalability.
- Sole developer in the project, reporting directly to the hospital's internal teams.

Lagash Systems 🇦🇷

Full stack .NET + Angular Developer
Sep 14 - Jun 20

Development of **+CHE**, a tool used by account managers at **ISBAN (Santander Group)** branches to manage client operations.

- Full stack development with **.NET** and **Angular**, covering modules for loans, personal data, credit card issuance, etc.
- Close collaboration with QA, UX, Product Owners, and banking business teams.
- Led the implementation of a **credit risk algorithm**, whose testing and validation were crucial for accurate results.
- Contributed in a high-regulation environment, ensuring code compliance and quality

Telecom 🇦🇷

Full Stack .NET + Angular Developer
Feb 10 – Sep 14

Development of **SEGAT**, an internal solution for the technical area 114 to manage work orders digitally.

- Participated in the design and development from scratch with **Silverlight**, later migrated to **.NET** and **AngularJS**.
- Helped replace manual workflows (paper and Excel) with centralized digital processes, enhancing operational efficiency.
- Collaborated with development, QA, UX, PO, and business management areas.
- This project was my **first professional experience**, giving me the opportunity to work through every stage of the software lifecycle.

EDUCATION

HIGHER TECHNICIAN IN APPLIED COMPUTER SCIENCE
UTN - INSPT | 2014 - 2016

COMPUTER TECHNICIAN
ET 21 "Fragata Libertad" | 2000 - 2005

TECHNICAL SKILLS

Languages:
- JavaScript (Vanilla)
- C#
- SQL

Frontend:
- React, Redux, Next.js
- HTML, CSS, Bootstrap
- Material UI, Radzen

Backend:
- .NET Core
- .NET Framework
- Web API
- Node.js

Databases:
- SQL Server
- MongoDB, Firebase

Dev Tools:
- Git, GitLab, Jira, Azure DevOps

Design:
- Adobe Photoshop, Adobe Premiere Pro

LANGUAGES

English: Upper Intermediate (B2) – continuously improving
